Cohesive MAS Hosting and Managed Services:

Empowering the Future of Asset Management

Ensure Reliability, Security, and Efficiency

Discover the power of Cohesive MAS Hosting and Managed Services, the ultimate solution for deploying, maintaining, and securing your IBM Maximo Application Suite and its underlying infrastructure. As the world's leading IBM Maximo partner, Cohesive offers a secure, efficient, and future-proofed hosting solution that takes your asset management to new heights.

Comprehensive
A single source, end-to-end, turnkey IBM Maximo Application Suite solution covering both the implementation & the hosting.

Reliable, Efficient, Secure
A smooth, efficient, and secure way to provision and handle the daily operations of your Maximo Application Suite instance.

Future-Proofed
Covers the full lifecycle of Maximo Application Suite, from the end-user experience to the maintenance of the different components of the applications.

Experience the Comprehensive Features of Maximo Application Suite

In September 2025, all IBM Maximo customers will need to transition to the Maximo Application Suite (MAS) Platform deployed on the Red Hat OpenShift platform. Many organizations are hesitant to learn OpenShift/Red Hat, but they are increasingly open to hosting options that allow them to focus on their core business.

To address this challenge head-on, Cohesive, an IBM Platinum Business Partner, has developed the Maximo Application Suite Hosting offering. Our solution provides numerous benefits and features, including:

Single source, end-to-end, turnkey Maximo hosting and implementation.
- Collaboration between hosting, service delivery, and support teams.
- Worldwide, 24/7 support coverage.

Dedicated, isolated environment with no co-location of data or access with other users.
- Dedicated public cloud account.
- No shared databases or application server clusters.

Easily tailored to your specific needs with a flexible Hybrid/SaaS model.
- Scale to match your Maximo usage, including users, storage, and integrations.
- Accommodate regional data center requirements.

Cohesive ensures our customers are always up to date.
- Navigate and provide guidance on IBM release lifecycle policies.
- Perform monthly maintenance activities.
- Conduct yearly MAS upgrades.

Cohesive deployments ensure a consistent, secure, and reliable end-user experience while allowing for easy scalability.
- Best practice architecture design and implementation.
- Perform monthly maintenance activities.
- Conduct yearly MAS upgrades.

Cohesive

It's Time to Rethink Maximo Hosting with Cohesive

When efficient asset management is critical to business success, choosing the right platform and partner can make all the difference. Cohesive offers an unparalleled and comprehensive platform for businesses of any size or industry to easily manage their assets.

Our team has closely collaborated with IBM's developers to create and test the new MAS platform. Advantages of Cohesive MAS Hosting with Red Hat OpenShift and Maximo Application Suite:

1. **Streamlined Deployment Process:**
Maximo Manage operator simplifies image pulling and deployment, ensuring a smooth installation experience. Configure images and workloads easily, such as UI, Cron, and BIRT reporting.

2. **Easy Customization:**
Store and apply customization archives effortlessly, enhancing your deployment without complexity.

3. **Built-in Monitoring and Logging:**
Maximo Manage dashboards within Red Hat OpenShift allow for easy log review and performance monitoring.

4. **Flexible Workload Configuration:**
Support various workloads, tailoring the system to your specific needs during application deployment.

5. **Seamless Integration with Other MAS Applications:**
Deploy complementary applications alongside Maximo Manage, creating a comprehensive asset management ecosystem.

6. **Efficient Database and Storage Management:**
Leverage cluster deployments for efficient management of Maximo Manage databases. Configure IBM Cloud Object Storage for seamless document storage handling.

7. **Messaging Provider Configuration:**
Configure messaging providers like JMS, IBM MQ, or Kafka for smooth communication within your Maximo Manage deployment.

With Cohesive MAS Hosting, you gain access to the powerful combination of Red Hat OpenShift and Maximo Application Suite, ensuring streamlined deployment, easy customization, and seamless integration with other MAS applications.

Unleash the Power of Cohesive Maximo Hosting and Managed Services

Experience the following compelling advantages when you migrate to Cohesive's cutting-edge Maximo Hosting and
Managed Services:

Unmatched Consistency, Security, and Reliability:
Our state-of-the-art deployment ensures a stable and secure environment, delivering an uninterrupted and trustworthy experience for your end-users.

Effortless Scaling to Fuel Your Growth:
Seamlessly accommodate the expansion of your organization with our flexible solution, enabling you to effortlessly scale up or down as needed.

Optimal Licensing for Maximum Value:
Harness the full potential of your Application Point usage by implementing our single suite licensing service, maximizing your investment and optimizing your licensing resources.

Unrivaled Expert Support:
Leave the complexities of Maximo deployment in the hands of our highly skilled team. With their extensive expertise, we will manage and maintain your system, allowing you to concentrate on driving your core business operations forward.

Make the smart move to Cohesive Maximo Hosting and Managed Services and unlock a new era of efficiency, security, and growth for your organization.
