Cohesive

IBM Maximo Application Suite:
Upgrade to the Ultimate Solution for Digital Enterprise Asset Management

Wait, what is IBM MAS?

IBM Maximo Application Suite (MAS) revolutionizes asset management by providing a unified platform that streamlines operations, enhances visibility, and maximizes the value of your assets throughout their lifecycle.

As Maximo 7.6 approaches its "End of Service" in September 2025, it's time to upgrade to MAS and unlock sustainable operational excellence. With the expertise of Cohesive, the world's largest Maximo EAM implementer, you can seamlessly transition to MAS and experience the following benefits:

Unified Platform
MAS is a unified platform delivering asset lifecycle, performance & maintenance. New efficiencies are identified & applied, maximizing asset value. Optimized uptime & performance levels and reduced maintenance costs via predictive analytics.

Improved visibility
MAS allows greater data sharing, with predictive maintenance for a better understanding of the asset, enabling improved asset management. Gives access to key monitoring and reliability applications on a single platform.

Greater Scalability
MAS is deployed in the RedHat OpenShift platform which offers scalability, and faster-running applications, using fewer resources. Updates are automatically available with minimal disruption.

How it all works

MAS provides a unified platform for accessing essential monitoring, maintenance, and reliability applications organization-wide. It eliminates data silos, enhances data sharing through an integrated user experience, and enables large-scale execution. With the Committed Term License, businesses gain complete suite access with a single entitlement.

Users seamlessly transition between applications using AppPoints, paying only for what they utilize, reducing costs. It empowers teams to deploy new capabilities, foster growth, and share industry-specific Digital Twin assets.

Maximo Application Suite offers a cost-effective path to predictive operations, implementing preventive, predictive, and prescriptive actions for efficiency and lower costs.

IBM Maximo Application Suite: Enhance asset availability, mitigate risks, optimize performance. Manage high-value assets for extended life cycles, reduced downtime, maximum efficiency with flexible deployment.

Added benefits:

- Improved utilization and performance
- Reduced capital and operational expenditure
- Extend the life of the asset
- Reduced operational downtime
- Productivity of assets uncompromised
- Improved return on asset
- Maximo version 7.6 is approaching **"End of Service" in September 2025**

What's included:

Maximo Manage (CMMS/EAM):

Optimize asset management and maintenance processes to improve operational performance. Leverage industry expertise, data models, and workflows for accelerated transformation. Unify asset management with role-based workspaces for better planning and control.

Maximo Monitor:

Improve asset and operational availability with AI-powered remote monitoring. Collect data from OT and IT systems in a single data lake to detect anomalies at scale.

Maximo Visual Inspection:

Perform visual inspections using iOS devices for immediate notifications of emerging issues. Scale easily for 24/7 monitoring across multiple locations. With integrated with workflows for insured fast response.

Maximo Health:

Manage asset health using IoT data to increase availability and improve replacement planning. Gain a true view of asset health through dashboard displays for informed decisions.
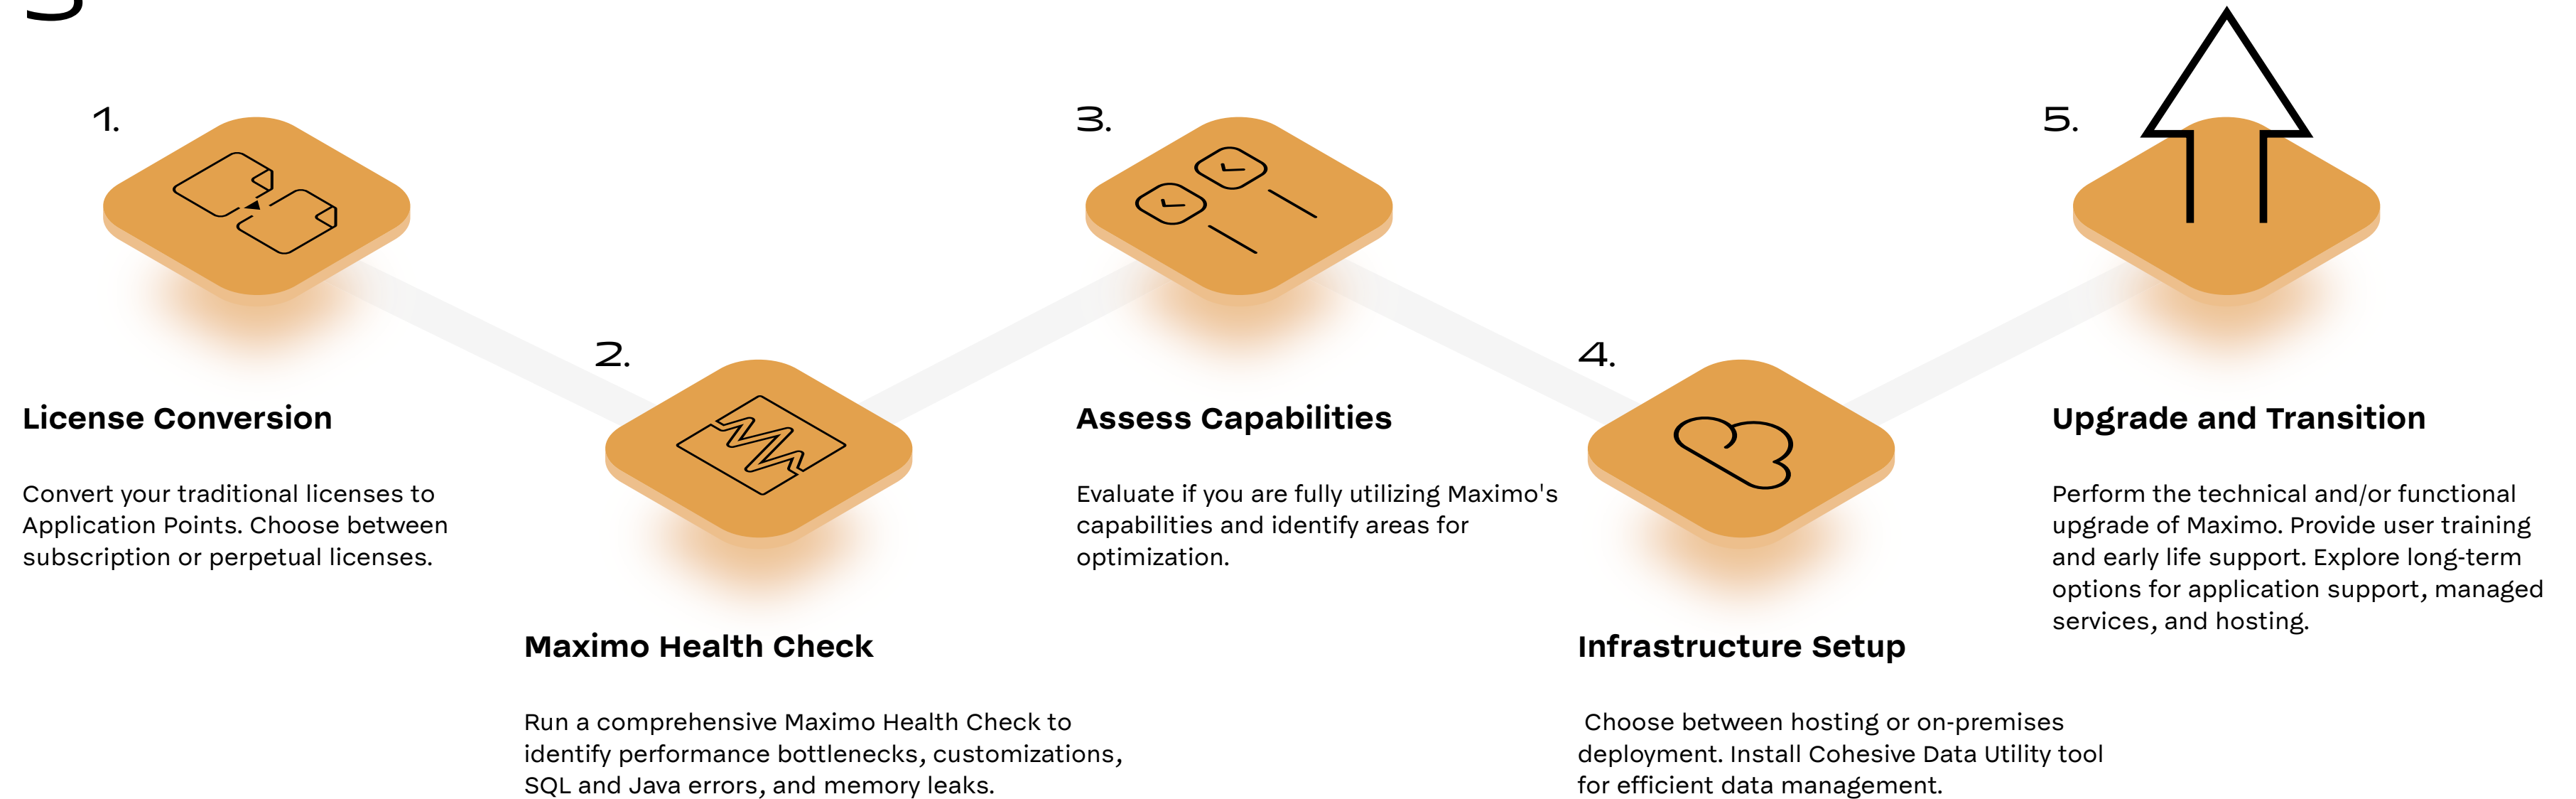

Maximo Predict:

Move beyond time-scheduled maintenance with condition-based action. Predicting future failures using machine learnings and data analytics to reduce costs and failures. Mak data-driven decisions with Watson Studio integration.

Maximo Mobile:

Manage assets anytime, anywhere. Empower field technicians with a mobile platform for easy navigation, access to asset history and data—even offline. Boost productivity and efficiency in remote locations.

5 Easy Steps to Upgrade

1.

License Conversion

Convert your traditional licenses to Application Points. Choose between subscription or perpetual licenses.

2.

Maximo Health Check

Run a comprehensive Maximo Health Check to identify performance bottlenecks, customizations, SQL and Java errors, and memory leaks.

3.

Assess Capabilities

Evaluate if you are fully utilizing Maximo's capabilities and identify areas for optimization.

4.

Infrastructure Setup

Choose between hosting or on-premises deployment. Install Cohesive Data Utility tool for efficient data management.

5.

Upgrade and Transition

Perform the technical and/or functional upgrade of Maximo. Provide user training and early life support. Explore long-term options for application support, managed services, and hosting.

Achieve unparalleled operational resilience with

IBM Maximo Application Suite and Cohesive, the leader in asset management solutions.

Unmatched Expertise:
With 300 qualified implementers globally, we are the world's largest Maximo EAM implementer. We've supported over 200 satisfied Maximo customers and delivered 150+ seamless Maximo Upgrades, leveraging our extensive experience.

Scalable and Affordable Solutions
Our scalable and cost-effective hosting and managed services for IBM Maximo Application Suite ensure a robust system. Focus on your core business while we handle the technical aspects.

Optimized Asset Performance:
Go beyond the basics and maximize asset ROI. Our powerful add-ons optimize scheduling and asset performance, driving efficiency and profitability.

Digital Transformation Leadership:
Embrace technology advancements with confidence. Our digital transformation and change management capabilities guide you to stay ahead of the competition and future-proof your business.

Secure Environment:
Rest easy knowing your data is protected. We manage the entire transformation process, ensuring the right data and digital infrastructure are in place, providing peace of mind.

End-to-End Asset Lifecycle Management:
Our comprehensive solution covers the entire asset lifecycle, adapting to your unique needs. Effectively manage and optimize assets, regardless of vendor or type.

ISO 55000 Compliance:
Align with industry best practices and demonstrate excellence. Our in-depth knowledge and experience ensure adherence to ISO 55000 standards.

As an IBM Platinum Partner, Cohesive offers extensive expertise in IBM Maximo deployment, data management, add-on integration, digital transformation, and change management. Ensure a seamless transition to MAS and achieve optimal asset lifecycle management while adhering to ISO 55000 standards and industry best practices.

Upgrade to IBM Maximo Application Suite with Cohesive and unlock the full potential of your assets today!
